

Hello everyone from Isabelle,  
I like say thank you everyone who come today and give us support. This is very important for every trans person and every sex worker. Thank you again and I like say sorry because today I not coming because I do not feel good and I stay at home.

What I like say is we need more support. Sex workers need respect and support. It does not matter where I work. If I work in bar or clubs or puff or bordel or in the street. But most support and protection need people who work in the street because situation is very difficult. Very difficult because we do not have much client and problem with police and we not have place were it is possible work. Its difficult. Very difficult. We must find some solution how we change this situation. I think import is support from people where we work. In the street people who live in this area nollendorfplatz, bülowstraße, schöneberg. Its important to have support from people who live here. We need respect from them.

I also like say sex work is work and we need respect and support equal like another work. Thank you so much. I hope we see us next time. Viele glück from isabelle.

The past half year has been really hard. Fines, police harassment, no clients, fear of getting sick and no help coming. Homeless people weren't housed during corona. There was no water or food passed out. Bars and cafés closed, leaving people without bathrooms, no way to charge their phones or to get some food and water.

I am very happy today that we are so many here today. But I do have to ask: where was everyone in march, april, mai, june, july, august....

The numbers are rising and we do not know yet what the winter months will hold. When you go home, please don't forget our trans siblings and colleagues that are working on the street, that are homeless, that need to work even if there are fines, that don't have access to money from the government or have money saved. Please think of how you can reach out to marginalized members of our community. If you are a trans sexworker that is here today and want to join our group: we would love that. Please reach out to trans\*sexworks over Instagram or fb or email

I want to also use this moment to tell you what we as a group want. A few weeks ago we had an informal meeting were a few of the women from the frobenstr. Thought of ideas what they want changed.

1. We want and apartment that our project could run and offer housing for homeless trans people and help them transition into their own apartment.
2. We want a social worker that is trans to work solely with homeless trans people
3. We want places where street based workers can work in. so called "Verrichtungsboxen"
4. We want the city to finance for us to have our own office for trans sexworkers. Due to there only being organization for cis women and cis men, trans sexworkers usually don't have many many options to turn to for help. We want to change this.

Thank you for being here today
